## Infection Prevention and Control Training, Assessment and Support

Angela Vassallo, MPH, MS, CIC, FAPIC and her team have received a grant from the California Department of Public Health's Healthcare-Associated Infections (HAI) Program. This grant will allow Angela and her team to assist nursing homes to build and maintain their infection prevention infrastructure necessary to support resident, visitor, and healthcare personnel safety. This opportunity will have a multidisciplinary team of experts consisting of Geriatric Doctors, Infection Preventionists, Nurses and Environmental Services.

The AV Epidemiology team has partnered with California Association of Long Term Care Medicine (CALTCM) in their mission of building cohesive leadership teams to support and train facilities to improve processes within facilities.

### Facility Requirements:

- Must be located in California and outside of Los Angeles County
- 1 or 2 Star rated skilled nursing facilities (SNFs)

### Program Highlights:

- Assess needs for each facility
- Linkages to expert professional services from our multidisciplinary team
- Performance Improvement Training and Support either virtual or on site

### Who will Participate in Training?

- Facility Leadership Team:
  - Administrator
  - Director of Nursing
  - Medical Director
  - Director of Staff Development
  - Infection Preventionist

*Angela Vassallo and her highly trained team of clinical experts support healthcare facilities, private medical practices, clinics, laboratories, public health departments, schools, film/tv/media, and other companies to assure safe workplaces for everyone.
